Bureau of Land Management

# Bureau of Land Management

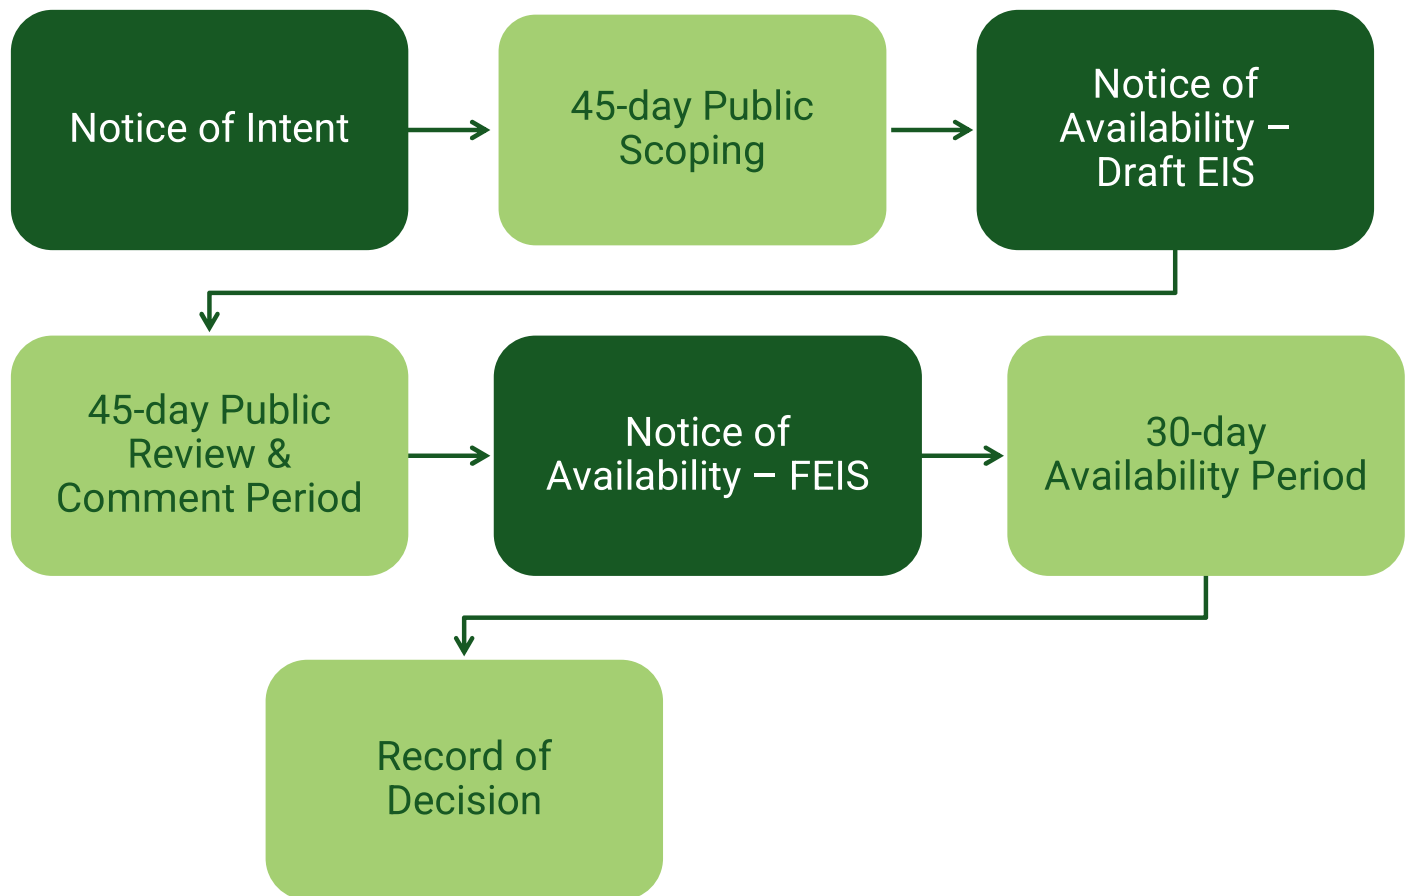

Southern Nevada District – Renewable Energy Program Update

September 2024

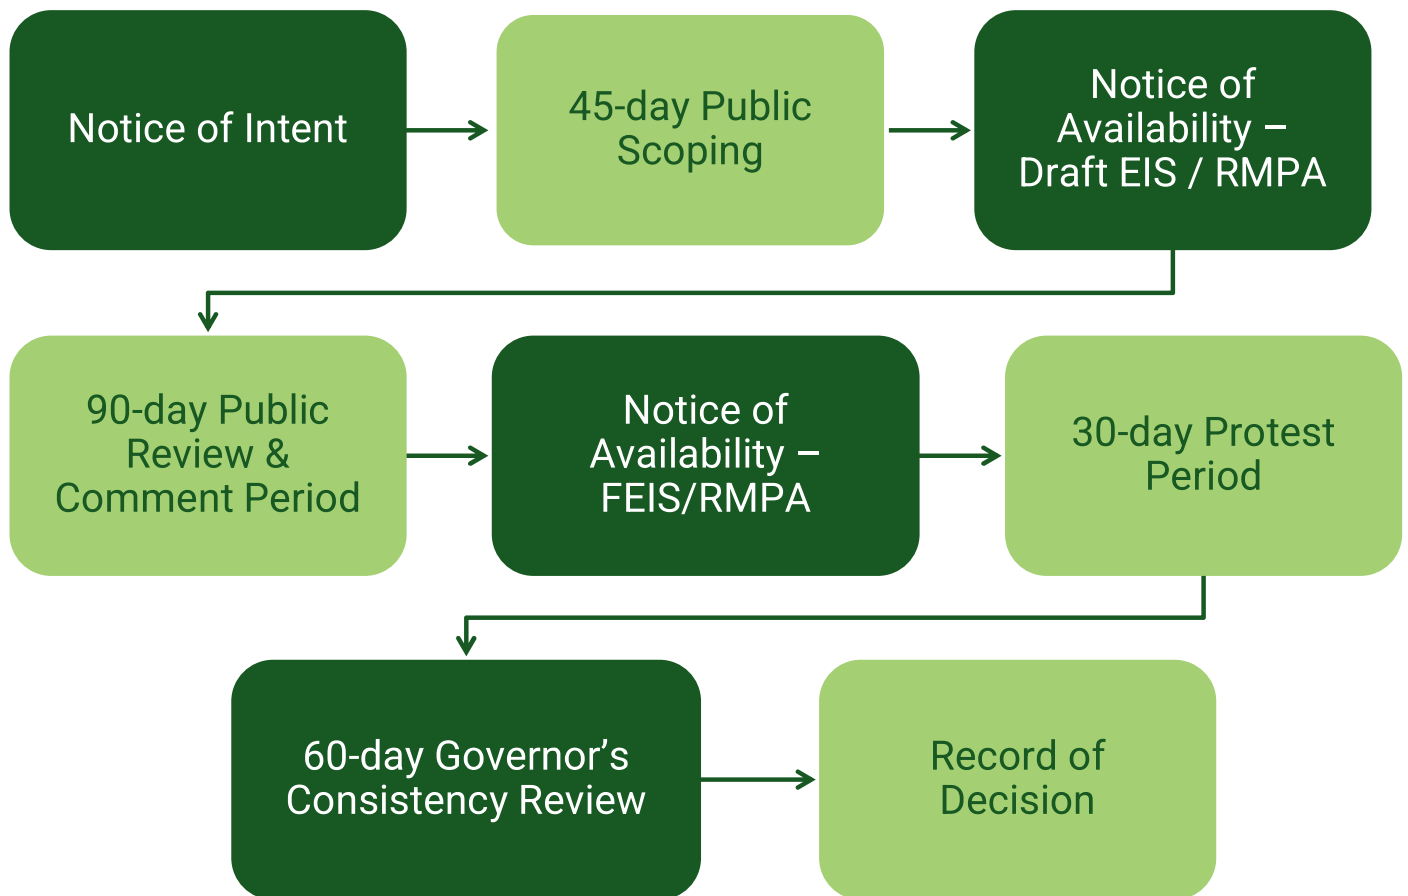

## **SNDO EIS Schedule**

## **SNDO EIS/RMPA Amendment Schedule**

U.S. Department of the Interior  
Bureau of Land Management

## **NHPA Section 106 and the NEPA Process**

The BLM will use and coordinate the required National Historic Preservation Act (NHPA) review of renewable energy projects with the National Environmental Policy Act (NEPA) process to fulfill the requirements under the NHPA, in a manner consistent with the standards and criteria outlined in [36 CFR 800.4](#) through [800.5](#).

BLM will consult on the effects of a Project on historic properties with the Nevada State Historic Preservation Office (SHPO), Indian Tribes, other consulting parties, and the Advisory Council on Historic Preservation, where appropriate, during NEPA scoping, environmental analysis, and the preparation of NEPA documents. The public will also be given the opportunity to be involved in accordance with BLM's NEPA procedures.

The BLM will provide the reviewed cultural resources report to the Nevada SHPO for review and concurrence on eligibility. Alternatives and mitigation measures would be developed and described in the Draft NEPA Document in consultation with identified consulting parties, in order to avoid, minimize, or mitigate any adverse effects of the undertaking on historic properties.

The BLM will provide the Draft NEPA Document to the Nevada SHPO, Indian Tribal Nations, the Advisory Council on Historic Preservation, and other consulting parties in accordance with 36 CFR 800.8(c) and the BLM's established NEPA procedures.

U.S. Department of the Interior  
Bureau of Land Management

## **Project Processing Priority Criteria Update**

On July 1, 2024 changes to the right-of-way regulations became effective ([Final Rule](#), [43 CFR 2800](#), [43 CFR 2804.35](#), [New Release Announcing Final Rule](#))

The criteria that BLM uses to identify a processing priority for an application were updated.

The next slide contains the six (6) criteria that BLM will now use to prioritize processing of applications.

U.S. Department of the Interior  
Bureau of Land Management

## **Project Processing Priority Criteria Update (Cont'd)**

43 CFR 2804.35(b) - The BLM will consider relevant criteria when prioritizing applications, including the following:

- (1) Whether the proposed project is located within an area preferred for solar or wind energy development, such as designated leasing areas, which include solar energy zones, development focus areas, and renewable energy development areas;
- (2) Whether the proposed project is likely to avoid adverse impacts to or conflicts with known resources or uses on or adjacent to public lands, and includes specific measures designed to further mitigate impacts or conflicts;
- (3) Whether the proposed project is in conformance with the governing BLM land use plans;
- (4) Whether the proposed project is consistent with relevant State, Tribal, and local government laws, plans, or priorities;
- (5) Whether the proposed project incorporates the best management practices set forth in the applicable BLM land use plans and other BLM plans and policies; and
- (6) Any other circumstances or prioritization criteria identified by the BLM in subsequent policy guidance or management direction through land use planning.

# E&I Team Workload Summary

**The Southern Nevada District's plan of work consists of sixteen (16) pending renewable energy applications that have been prioritized as either high or medium priority for processing.**

**The sixteen projects included in the current plan of work propose more than nine (9) gigawatts (GW) of renewable energy generation.**

**Of the sixteen projects, five projects (proposing a total of two gigawatts) are in the environmental review phase.**

**The other eleven projects are either in the baseline information collection phase, or are planned and have not yet entered that phase of review.**

# Projects Under Construction

- **Yellow Pine Solar**
  - Construction of Phase I – Commercial Operations (125MW)
  - Construction of Phase II (125MW) - underway
  - NTP for remaining 250MW outstanding
- **Townsite Solar II – ROW Issued**

U.S. Department of the Interior  
Bureau of Land Management

## Project Name: Yellow Pine Solar Project

**Applicant:** NextEra Renewables (multiple assignments completed)

**Acres:** ~3,000 acres

**MWs:** 500MW

**Field Office:** LVFO

**County:** Clark

**Location:** Pahrump Valley

**FAST-41:** Covered Project

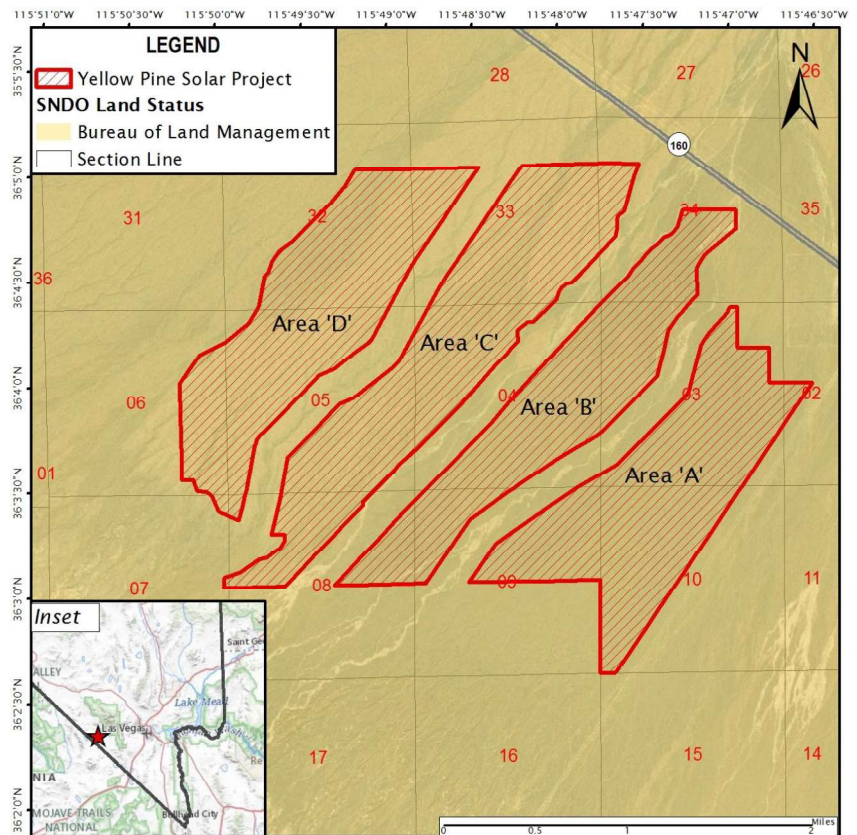

(<https://www.permits.performance.gov/permitting-project/fast-41-covered-projects/yellow-pine-solar>)

**Interconnection:** Trout Canyon Substation

**Approval Date:** ROD 11/2020; ROW 1/15/2021; LNTP Phase I & II 11/11/2021

**Status:** LNTP Issued for 250MW (subareas A-C) – Commercial operations; LNTP issued for subarea D: fencing/geotechnical; NTP pending for subarea D

**Information:** <https://eplanning.blm.gov/eplanning-ui/project/81665/510>

U.S. Department of the Interior  
Bureau of Land Management

## Project Name: Townsite Solar 2 Project

**Applicant:** Skylar Energy

**Acres:** 80 acres

**MWs:** 19MW

**Field Office:** LVFO

**County:** Clark

**Location:** Eldorado Valley area

**Interconnection:**

**Status:** LNTF for geotechnical investigation issued. Pre-NTP preparation work ongoing.

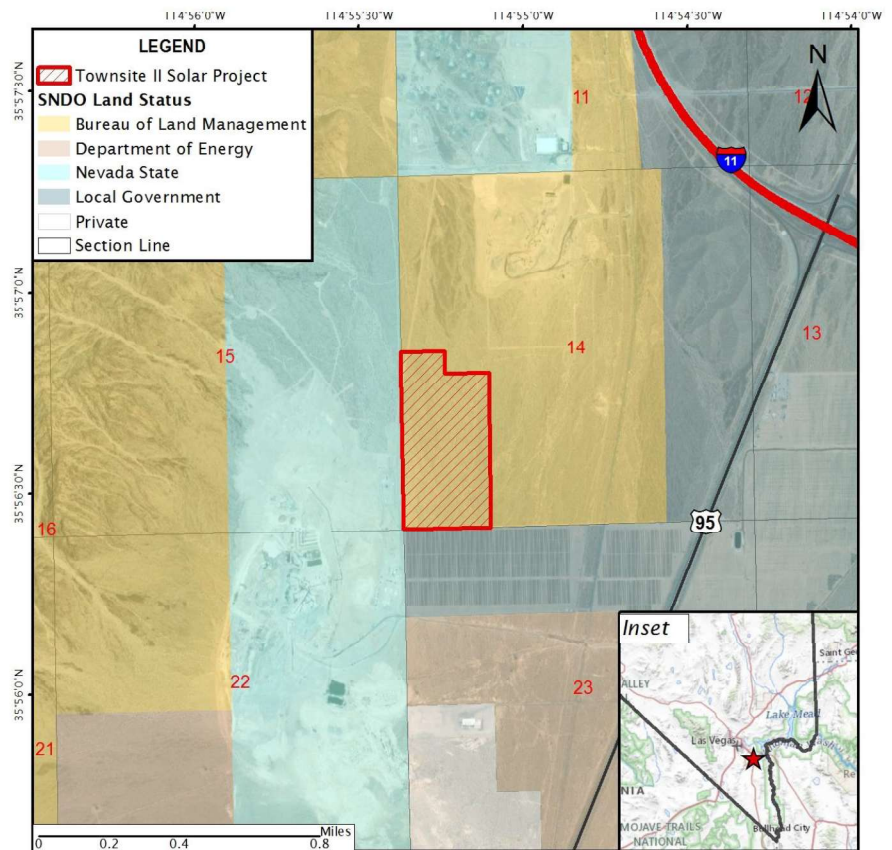

### Schedule Milestones:

ROW Issued – 9/29/2023

**Target COD:** TBD

## Geotechnical Investigation

Status: Application Submitted, BLM reviewing

Project Information:

*Coming Soon*

U.S. Department of the Interior  
Bureau of Land Management

## Project Name: Larrea Solar (fka Cathedral)

**Applicant:** (Candela Renewables)

**Acres:** 1,055 acres

**MWs:** 205MW / XX (BESS)

**Field Office:** LVFO

**County:** Clark

**Location:** Pahrump Valley

**Interconnection:** Trout Canyon Substation

**Status:** Resource surveys ongoing. **Preparing for Variance**

### Schedule Milestones:

Q2 2023 – Q2 2024 Variance /  
Baseline Needs – Data collection,  
studies, reports

**Variance Input Period – Fall 2024**

**Agency Meeting – Fall 2024**

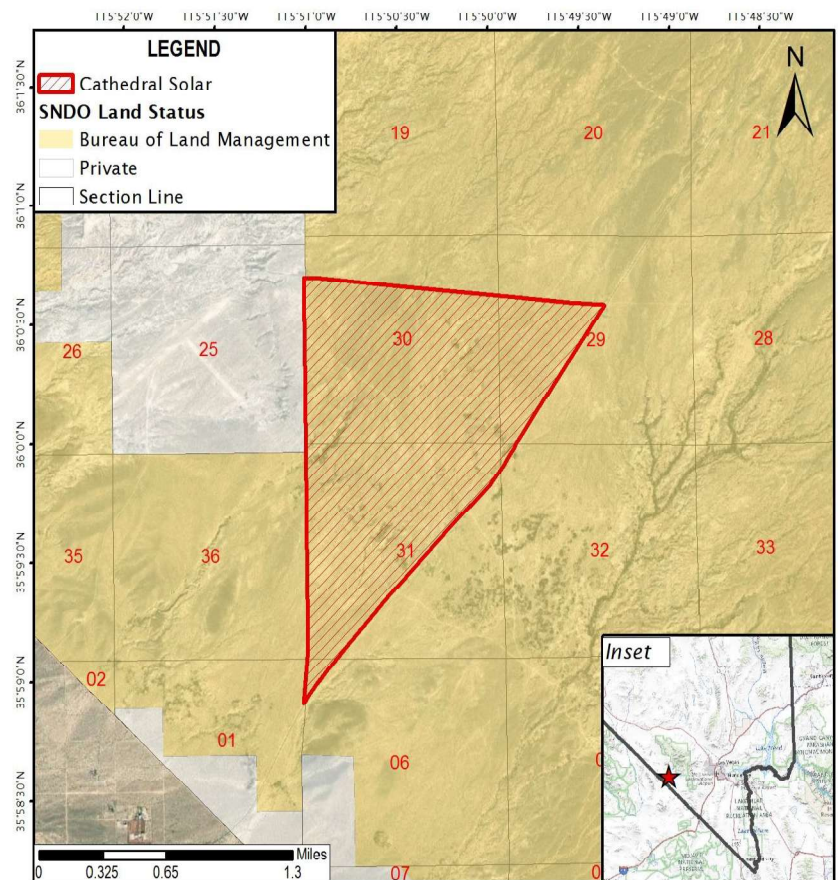

The following milestones assume a favorable  
Variance Determination -

Q3 2024 – Q2 2025 Updated POD for Pre-  
NEPA – Project  
Alternatives Supplemental Information  
Report / Supplemental Environmental  
Report

Q3 2025 – Q4 2026 EIS (duration may  
be reduced, if an RMPA is not required)

**Target COD:**

**Project Information:**

U.S. Department of the Interior  
Bureau of Land Management

## Project Name: Mosey Solar Project

**Applicant:** Renew Development HoldCo LLC (Clearway)

**Acres:** 3,472 acres

**MWs:** 500MW / 0 (BESS)

**Field Office:** PFO, LVFO

**County:** Clark, Nye

**Location:** Pahrump Valley

**Interconnection:** Trout Canyon Substation

**Status:** Segregation Published. Resource surveys starting in Spring 2024. **Preparing for Variance (Fall 2024).**

### Preliminary Schedule Milestones:

**Q3 2023 – Q4 2024\*** Variance / Baseline Needs – Data collection, studies, reports

**\*Schedule delay: Applicant started data collection this Spring 2024**

Following milestones assume a favorable Variance determination -

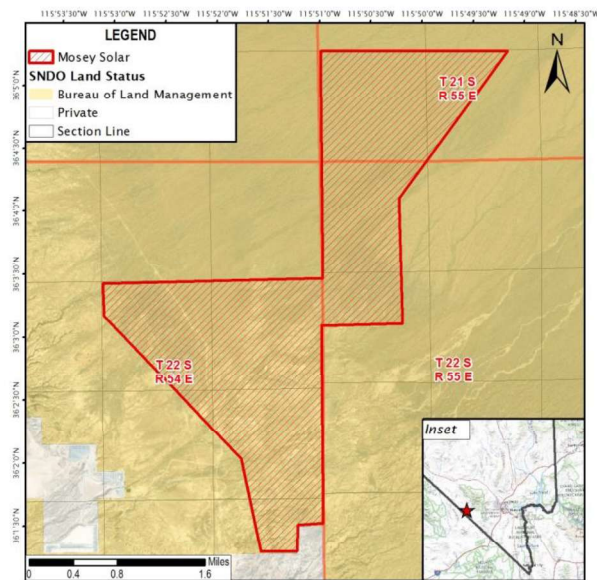

Q1 2025 – Q4 2025 POD Final for Analysis – Project Alternatives Supplemental Information Report / Supplemental Environmental Report

Q1 2026 – Q2 2027 EIS (duration may be reduced, if an RMPA is not required)
